## PROJECTS

**Your Finance Tracker**

[\[Link\]](#)

*Personal Finance Tracking Web Application*

*Technologies Used: HTML, CSS, JavaScript, Git, GitHub, PostgreSQL*

- Developed a responsive **personal finance tracking web application** with a clean, user-friendly interface that allowed users to **monitor income and expenses**, and **set financial goals**
- Implemented **CRUD** (*Create, Read, Update, Delete*) functionality for transaction management, enabling users to add, edit, and delete financial transactions
- **Integrated export** functionality to download transaction data to **PDF and CSV** formats, allowing users to save and share their financial records easily
- Utilized **JavaScript event listeners** and **Mutation Observers** to dynamically update the UI based on user actions and transaction changes

**Finpal – Devopia**

[\[Link\]](#)

- Created a financial Dashboard for tracking of expenses and income which also gives insights into a user's spending habits.
- Integrated this with WhatsApp Chatbot which helped track funds once a user puts details in it.

**USA Election Analytics**

- Developed a basic interactive USA analytics map inspired by the 270toWin platform using HTML, CSS and JavaScript, visualizing state-level data in an intuitive, user-friendly interface.
